Configuration Guide

IBM
IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS
Version 5.4.0

Buffer Pool Analyzer for z/OS
Configuration Guide
Note
Before you use this information and the product it supports, read the information in "Notices" on page 15.

First edition, December 2016
This edition applies to the following releases and to all subsequent releases and modifications until otherwise indicated in new editions:

- IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS, version 5, release 4, modification 0 (5655-W37)

This edition replaces SH12-7058-00.

About this information

This information describes how to configure the component Buffer Pool Analyzer for z/OS® (hereafter abbreviated to Buffer Pool Analyzer).

The technical changes for this edition are summarized under “What’s new” on page ix. Specific changes since the previous edition of this information are indicated by a vertical bar (|) to the left of a change.

Always check the IBM® DB2® and IMS™ Tools Library web page and the Tivoli® library page for the most current version of this information:

- [Tivoli OMEGAMON® XE for DB2 Performance Expert on z/OS](https://www.ibm.com/support/docview.ws/docid/6008807) (PDFs and Techdocs on DB2 Tools Product Page)
- [Tivoli OMEGAMON XE for DB2 Performance Monitor on z/OS](https://www.ibm.com/support/docview.ws/docid/6835017) (PDFs and Techdocs on DB2 Tools Product Page)

Who should read this information

This information is written for database administrators (DBAs), system programmers, and system operators who are responsible for configuring Buffer Pool Analyzer.

To configure this program you should have a working knowledge of:
- Multiple Virtual Storage (MVS™)
- Time Sharing Option (TSO)
- Interactive System Productivity Facility (ISPF)
- Job control language (JCL)
- Structured Query Language (SQL)
- z/OS

Conventions used in this publication

This publication uses several conventions for special terms and actions.

- **Boldface type** indicates user interface controls such as names of fields, folder, icons, or menu choices.
- **Monospace type** indicates examples of text that you enter exactly as shown.
- **Italic type** indicates publication titles and emphasizes significant words.

The following labels identify significant elements within this publication:
- **Example:** identifies example code or scenarios.
- **Prerequisite:** identifies a condition that must be met to ensure that the product is functional.
- **Restriction:** identifies a restriction or limitation with this product or an associated procedure.
- **Tip** suggests an action that might simplify a task or improve some aspect of the product.
- **Important:** identifies an important note.
Terminology used in this publication

Buffer Pool Analyzer Client is the client component of the program. It includes the user interface of Buffer Pool Analyzer.

Where to find information

You can access the documentation in several ways.

The documentation for this product is provided in PDF and in HTML format at the following websites:

- [Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS](#)
- [Tivoli OMEGAMON XE for DB2 Performance Monitor on z/OS](#)

Ordering publications

You can order many IBM publications such as product manuals or IBM Redbooks® online at the [IBM Publications Center](#) website.

You can also order by telephone by calling one of the following numbers:

- In the United States: 800-879-2755
- In Canada: 800-426-4968

In other countries, contact your software account representative to order Tivoli publications.

Accessing terminology online

The [IBM Terminology](#) website consolidates the terminology from IBM product libraries in one convenient location.

Service updates and support information

You can access support information for IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS and IBM Tivoli OMEGAMON XE for DB2 Performance Monitor on z/OS on the Support home website, or you can use the IBM Support Assistant.

Support home

On the [Support home](#) website, you can find service updates and support information including software fix packs, PTFs, Frequently Asked Questions (FAQs), technical notes, troubleshooting information, and downloads.

Accessibility features

Accessibility features help people with a physical disability, such as restricted mobility or limited vision, or with other special needs, to use software products successfully. This Knowledge Center is developed to comply with the accessibility requirements of software products according to Section 508 of the Rehabilitation Act of the United States.

The accessibility features in this Knowledge Center enable users to do the following tasks:
• Use assistive technologies, such as screen-reader software and digital speech synthesizer, to hear what is displayed on the screen. In this Knowledge Center, all information is provided in HTML format. Consult the product documentation of the assistive technology for details on using assistive technologies with HTML-based information.
• Operate specific or equivalent features using only the keyboard.
• Magnify what is displayed on the screen.

In addition, all images are provided with alternative text so that users with vision impairments can understand the contents of the images.

Navigating the interface by using the keyboard

Standard shortcut and accelerator keys are used by the product and are documented by the operating system. Refer to the documentation provided by your operating system for more information.

Magnifying what is displayed on the screen

You can enlarge information in the product windows using facilities provided by the operating systems on which the product is run. For example, in a Microsoft Windows environment, you can lower the resolution of the screen to enlarge the font sizes of the text on the screen. Refer to the documentation provided by your operating system for more information.

How to send your comments

Your feedback is important in helping to provide the most accurate and high-quality information.

If you have any comments about this information or any other documentation, you can complete and submit the Reader Comment Form.
What's new

This topic summarizes the significant improvements or enhancements for the product and refers you to the relevant topics for more information.

**SH12-7076-00 — December 2016**

This edition is a continuation of the previous *IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS: Buffer Pool Analyzer Configuration Guide*, SH12-7058-00.

- Buffer Pool Analyzer is now delivered with IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS only, it is no longer available as a standalone product.
Chapter 1. Introduction to Buffer Pool Analyzer

This topic introduces the main functions and components of Buffer Pool Analyzer.

Buffer Pool Analyzer helps database administrators manage buffer pools more efficiently by providing information about current buffer pool behavior and using simulation to anticipate future behavior.

Buffer Pool Analyzer provides the following functions:
• Support for object placement, including support of inactive objects (table spaces and buffer pools)
• Expert analysis through an easy-to-use wizard that runs on a workstation and guides you through the process of object placement
• Batch trace collection and ISPF collect report data (CRD)
• Several comprehensive reports that you can browse or print
• Data collection of virtual buffer pool activity via DB2
• Comprehensive reporting of the buffer pool activity, including:
  – Ordering by various identifiers such as buffer pool, plan, object, and primary authorization ID
  – Sorting by getpage, sequential prefetch, and synchronous read
  – Filtering capability, and loading into tables
• Simulation of buffer pool usage for varying buffer pool sizes and different object placement
• Display of report and simulation results on workstations in form of spreadsheets, graphs and diagrams
• Reporting
• Long-term analysis
Chapter 2. Configuration summary for Buffer Pool Analyzer

Follow the installation instructions in the Program Directory that is included with Buffer Pool Analyzer. After you install Buffer Pool Analyzer, you must configure the tool by using the instructions in this topic.

The SMP/E installation of Buffer Pool Analyzer is described in Program Directory for IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS.

This topic describes how to configure the setup of Buffer Pool Analyzer. It also explains the mandatory or optional setup steps, and shows the corresponding authorizations that you need to perform each step.

**Recommendation:** The product image is installed from tape to the high-level qualifier hlqdb2pe. Before you start the configuration, you should create other data sets to which sample members are to be copied and where sample members are to be changed. This prevents your sample members from being overwritten, for example, when you install a program temporary fix (PTF).

**Overview of the setup procedure for Buffer Pool Analyzer**

The table in this section shows a typical configuration procedure for Buffer Pool Analyzer.

**Table 1. Typical configuration procedure for Buffer Pool Analyzer**

</tr>
</tbody>
</table>

Step 1: Granting DB2 privileges for Buffer Pool Analyzer

This section explains how to grant DB2 privileges for Buffer Pool Analyzer.
About this task

You must perform this step for each DB2 subsystem for which you want to use Buffer Pool Analyzer.

To grant DB2 privileges, do the following:

Procedure

1. Run section 1 of the DDL member BPOYAUTH.
2. Run the DDL member by using SQL Processor Using File Input (SPUFI) or an equivalent.

What to do next

Ensure that the SQL return code is 0 and that a commit is performed.

---

**Step 2: Binding Buffer Pool Analyzer packages for DB2**

This section explains how to bind Buffer Pool Analyzer packages for DB2.

About this task

You must perform this step for each DB2 subsystem for which you want to use Buffer Pool Analyzer.

1. Change the DB2 subsystem ID.
2. Change the DB2 high-level qualifier in the job BPOYBIND.
3. Run the job BPOYBIND.
4. Repeat this step.

---

**Step 3: Binding DB2 plan**

In this step you bind the plan for Buffer Pool Analyzer.

About this task

To bind the plan for Buffer Pool Analyzer, run the job BPOYPLAN for each DB2 subsystem for which you want to use Buffer Pool Analyzer.

---

**Step 4: Reviewing security requirements for Buffer Pool Analyzer**

Depending on your system software and the functions that you plan to use, you might have to change the existing security definitions.

About this task

To work with the Host Online Monitor, users need the following DB2 privileges:

**EXECUTE**

On the host online monitor plan (K02PLAN).

**MONITOR1**

Grants the privilege to obtain IFC data classified as serviceability data, statistics, accounting, and other performance data that does not contain potentially sensitive data.
MONITOR2
Grants the privilege to obtain IFC data classified as containing potentially sensitive data, such as SQL statement text and audit data. Note that users with MONITOR2 privileges have also MONITOR1 privileges.

TRACE and DISPLAY
For users who have to use the CRD function.

GRANT statements to support these authorizations are included in section 2 of the DDL member BPOYAUTH.

---

**Step 5: Changing the FPEJINIT EXEC**

**About this task**

To change the FPEJINIT EXEC, do the following:

**Procedure**

1. Copy the FPEJINIT EXEC from the target library hlqdb2pe.TKO2SAMP into a library that is in your EXEC library concatenation.
2. Change the corresponding lines in this EXEC. They are at the beginning of the EXEC and are delimited by comments. These comments indicate the start and the end of the section that you can change.
   ```
   checks = 1;
   rte_mode = 0;
   smpe_mode = 1;
   hlq2.1 = "hlq of SMP/E data sets";
   sclm_mode = 0;
   where "hlq of SMP/E data sets" denote the names that you choose for the SMP/E target libraries.
   For example, if the libraries start with SYS1.DB2BPA, change the statement in the following way:
   hlq2.1 = "SYS1.DB2BPA"
   3. Save the updated FPEJINIT EXEC.
4. Optionally change the FPEJINIT EXEC after the installation verification procedure (IVP) completes successfully from checks = 1 to checks = 0.

**What to do next**

**Requirement:** If you want to use the Host Online Monitor, you must do the following before you start your ISPF session:

- Allocate the DB2 load library corresponding to the version and release number of the DB2 subsystem to be monitored to ISPLLIB. You can also have the library in a STEPLIB, JOBLIB, or the system LNKLST concatenation.
- To test this EXEC, perform the installation verification procedures as described in Chapter 3, “Verifying configuration and setup of Buffer Pool Analyzer,” on page 9.

---

**Step 6: Configuring ISPF defaults**

BPOJVARS is a REXX EXEC in the library hlqdb2pe.TKO2SAMP that you can use to configure defaults for the ISPF dialog.
About this task

To run this EXEC and configure ISPF defaults for Buffer Pool Analyzer, do the following:

Procedure
1. Enter the following command in ISPF option 6 (TSO Command Processor) to run the EXEC:
   ```
   EXEC 'hlqdb2pe.TKO2SAMP(BPOJVARS)'
   ```
   The following panel shows the parameters.

<table>
<thead>
<tr>
<th>BPOJOPTS</th>
<th>IBM DB2 Buffer Pool Analyzer Customization</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete fields as indicated, then press Enter.</td>
<td></td>
</tr>
<tr>
<td>Type requested names</td>
<td></td>
</tr>
<tr>
<td>z/OS subsystem name ... DG0V</td>
<td></td>
</tr>
<tr>
<td>Load library . . . . . . . 'BPO540.TKANMOD'</td>
<td></td>
</tr>
<tr>
<td>Select option with '/'</td>
<td></td>
</tr>
<tr>
<td>/ Load library is in the system LNKLST concatenation</td>
<td></td>
</tr>
<tr>
<td>F1=Help F2=Split F9=Swap F12=Cancel</td>
<td></td>
</tr>
</tbody>
</table>

2. Check the following parameters and configure them according to your needs:
   - z/OS subsystem name
   - Load library name
   - Load library in the system LNKLST concatenation

3. Complete the panel fields and press Enter.
   Message BPOJ0008 is displayed.
   In the following example, the name of the load library is changed. It is also specified that the load library is in the system LNKLST concatenation.

<table>
<thead>
<tr>
<th>BPOJOPTS</th>
<th>IBM DB2 Buffer Pool Analyzer Customization</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete fields as indicated, then press Enter.</td>
<td></td>
</tr>
<tr>
<td>Type requested names</td>
<td></td>
</tr>
<tr>
<td>z/OS subsystem name ... DG0V</td>
<td></td>
</tr>
<tr>
<td>Load library . . . . . . . 'SYS1.TKANMOD'</td>
<td></td>
</tr>
<tr>
<td>Select option with '/'</td>
<td></td>
</tr>
<tr>
<td>/ Load library is in the system LNKLST concatenation</td>
<td></td>
</tr>
<tr>
<td>F1=Help F2=Split F9=Swap F12=Cancel</td>
<td></td>
</tr>
</tbody>
</table>

Step 7: Adding Buffer Pool Analyzer to your ISPF environment

This topic is intended primarily for DBAs working with ISPF and TSO systems.

About this task

You can add Buffer Pool Analyzer as an ISPF application to your environment.
To update the corresponding panels so that this ISPF application can be started, do the following:

**Procedure**

1. Select a panel that is available to all users, for example, the ISPF/PDF main menu ISR@PRIM.
2. Change the panel for the application.
   The associated ZSEL variable value for the application is CMD(%FPEJINIT).
3. Ensure that the new version of the FPEJINIT EXEC is available in the active EXEC library. FPEJINIT uses the TSO ALTLIB command to allocate and deallocate the EXEC library dynamically.

---

**Step 8: Optional. Adding Buffer Pool Analyzer to the DB2 Administration Tool launchpad**

**About this task**

**Requirement:** You must have system administrator privileges to perform this step.

To add Buffer Pool Analyzer to the DB2 Administration Tool launchpad, do the following:

**Procedure**

1. Edit the sample EXEC BPOADBI in the library hlqdb2pe.TKO2SAMP in the following way:
   a. Set the high-level qualifier of DB2 Admin data sets.
   b. Set the name of the CLSIT/EXEC library, which contains the ADBDMTI exec.
   c. Specify the ISPF statement to invoke Buffer Pool Analyzer.
2. Execute the EXEC BPOADBI.
   Buffer Pool Analyzer is added to the launchpad.

**Related reading:** For more information about how to add an IBM DB2 tool for the launchpad, refer to **DB2 Universal Database™ for z/OS Administration Guide**.

---

**Step 9: Optional. Installing Buffer Pool Analyzer Client**

**About this task**

To use the graphical user interface (GUI), you must install Buffer Pool Analyzer Client. How to do this is described in **Chapter 4, “Installing Buffer Pool Analyzer Client,” on page 11.**
Chapter 3. Verifying configuration and setup of Buffer Pool Analyzer

This topic contains a summary of the configuration and verification jobs. It also shows how to run a sample job to verify the configuration of Buffer Pool Analyzer.

Summary of configuration and verification jobs

The following table shows the configuration jobs that you can edit and run after the SMP/E installation is finished.

The SMP/E installation is described in Program Directory for IBM DB2 Buffer Pool Analyzer for z/OS.

Table 3. Summary of configuration jobs for Buffer Pool Analyzer

<table>
<thead>
<tr>
<th>Job</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BPOYAUTH</td>
<td>Grant DB2 privileges for Buffer Pool Analyzer. Use the DDL member.</td>
</tr>
<tr>
<td>BPOYBIND</td>
<td>DB2 bind packages for Buffer Pool Analyzer.</td>
</tr>
<tr>
<td>BPOYPLAN</td>
<td>DB2 bind plan for Buffer Pool Analyzer.</td>
</tr>
<tr>
<td>BPOYAUTH</td>
<td>Review security requirements. Use the DDL member.</td>
</tr>
<tr>
<td>BPOJIVPA</td>
<td>Verifies the configuration of Buffer Pool Analyzer.</td>
</tr>
</tbody>
</table>

Running the sample verification job

You can run the verification job BPOJIVPA after the configuration is finished.

About this task

Data set hlqdb2pe.TKO2SAMP contains the sample job BPOJIVPA to help you verify the configuration.

Submit the job BPOJIVPA. This procedure causes the production of a report file. The expected return code is zero.

Final step

Verification of the configuration is now complete.

About this task

After the IVP completes successfully, move the updated FPEJINIT to a system EXEC or CLIST library so that the users can access it.
Chapter 4. Installing Buffer Pool Analyzer Client

This topic describes how to install Buffer Pool Analyzer Client. It also explains how to start it. Buffer Pool Analyzer Client is required if you want to use the graphical user interface (GUI) of Buffer Pool Analyzer Client.

Note: IBM Tivoli OMEGAMON XE for DB2 Performance Monitor on z/OS:
From Version 5.4.0 Buffer Pool Analyzer is no longer a standalone option, it is only delivered as part of IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS. If you want to update your client you must select IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS.

Hardware requirements

The minimum hardware requirements to install and run Performance Expert Client are:

- A personal computer with Intel-based processor architecture, 400 MHz Pentium
- 512 MB RAM
- 390 MB (Windows 64-bit) disk space in the installation directory for the installation files
- 350 MB temporary space for running the installation program
- A high-resolution display unit of 1024 x 768 or higher
- For object placement, the following free memory:
  - 60 MB for up to 1000 objects
  - 220 MB for up to 100 000 objects
  - 500 MB for up to 200 000 objects
  where objects are table spaces and index spaces.

Recommendation: If you have installed only the minimum requirements, you should not run other applications at the same time.

Software requirements

The minimum software requirements to install and run Buffer Pool Analyzer Client are:

- One of the following Windows (x86, x86-64) versions:
  - Windows XP Professional Edition with Service Pack 2, including XP FDCC
  - Windows 7 Professional Edition and Ultimate Edition including FDCC
• Optimization Service Center for DB2 for z/OS V1.1 or Optimization Service Center for DB2 for z/OS V1.2
• TCP/IP installed on the workstation
• One of the following web browsers:
  – Microsoft Internet Explorer V5 or later
  – Netscape Navigator V7 or later
  – Mozilla V1.5 or later
• Software programs to download files or code from z/OS, such as File Transfer Protocol (FTP) or IBM Personal Communications

---

#### Installing the program files

**About this task**

**Requirement:** You must have administration privileges to install Buffer Pool Analyzer Client.

After the installation completes successfully, you can start Buffer Pool Analyzer Client and use its functions from the DB2 Control Center.

#### Downloading the program files of Buffer Pool Analyzer Client

Both the initial version and later fixes for the program files for Buffer Pool Analyzer Client are available online. For download instructions, refer to the technote “OMPE: web-based delivery of updates for PE Workstation Client and PE Agent” on the IBM Software Support website. If needed, a direct link to the technote is included in the hold instructions of every PE Client PTF on the host. The available program build levels and fix descriptions are documented in the technote.

**Note:** The technote and website refer to the Performance Expert Client rather than the Buffer Pool Analyzer Client. However, these are the same. You chose at installation which product you want to install.

#### Installing Buffer Pool Analyzer Client

After downloading the program files of Buffer Pool Analyzer Client, you can install them using the InstallAnywhere Wizard.

Before you begin, do the following:

• Verify that you have administration privileges.
• Download the program files of Buffer Pool Analyzer Client. See “Downloading the program files of Buffer Pool Analyzer Client” for more information.
• Close the DB2 Control Center before installing the Buffer Pool Analyzer Client program files.

To install the program files, do the following:

1. Verify that you have closed the DB2 Control Center. The DB2 Control Center must be closed before you start the client installation in order for the Control Center plugin to be installed properly.
2. Extract the files and directories from the compressed file(s) into the installation directory, for example, C:\PROGRAMS\IBM\BPACLIENT.

   The archives contain the following files and directories:
   • `db2pe.client.*.exe`
   The InstallAnywhere Wizard starts, and the IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS V5 Setup window opens.
   If you did not close the DB2 Control Center before installing the plug-in then you might not be able to access the Buffer Pool Analyzer Client from the DB2 Control Center.
4. Click Next.
   The next IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS V5 Setup window shows the License Agreement.
5. To install Buffer Pool Analyzer Client, select I accept the terms of the license agreement, then click Next.
   The next IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS V5 Setup window opens. It lets you select the different clients.
6. Click Buffer Pool Analyzer Client, then click Next.
   The IBM DB2 Buffer Pool Analyzer V5 Setup window opens. It lets you specify the installation path.
7. To install the program files to the default destination folder, click Next. To install the program files to a different folder, click Browse and select another folder.
   The next IBM DB2 Buffer Pool Analyzer V5 Setup window opens.
8. Select the setup type that you prefer, then click Next.
   The next IBM DB2 Buffer Pool Analyzer V5 Setup window opens.
9. Check the summary information, then click Install.
   The program files are copied to the specified destination folder and the next IBM DB2 Buffer Pool Analyzer V5 Setup window opens. It shows summary information about the installation. It also shows the location of the log file.
10. Click Finish to exit the InstallAnywhere Wizard.

**Starting Buffer Pool Analyzer Client**

**About this task**

To start Buffer Pool Analyzer Client, do either of the following:

- Click Start → Programs → IBM DB2 Buffer Pool Analyzer for z/OS → IBM DB2 Buffer Pool Analyzer for z/OS.
- Double-click the IBM DB2 Buffer Pool Analyzer for z/OS icon on your desktop.

Buffer Pool Analyzer Client is then started.

**Related reading:** For information about how to work with Buffer Pool Analyzer Client, refer to *Buffer Pool Analyzer User’s Guide*.

Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user’s responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing
IBM Corporation
North Castle Drive, MD-NC119
Armonk, NY 10504-1785
US

For license inquiries regarding double-byte character set (DBCS) information, contact the IBM Intellectual Property Department in your country or send inquiries, in writing, to:

Intellectual Property Licensing
Legal and Intellectual Property Law
IBM Japan Ltd.
19-21, Nihonbashi-Hakozakicho, Chuo-ku
Tokyo 103-8510, Japan

INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

Any references in this information to non-IBM websites are provided for convenience only and do not in any manner serve as an endorsement of those
websites. The materials at those websites are not part of the materials for this IBM product and use of those websites is at your own risk.

IBM may use or distribute any of the information you provide in any way it believes appropriate without incurring any obligation to you.

Licensees of this program who wish to have information about it for the purpose of enabling: (i) the exchange of information between independently created programs and other programs (including this one) and (ii) the mutual use of the information which has been exchanged, should contact:

IBM Director of Licensing
IBM Corporation
North Castle Drive, MD-NC119
Armonk, NY 10504-1785
US

Such information may be available, subject to appropriate terms and conditions, including in some cases, payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement or any equivalent agreement between us.

The performance data discussed herein is presented as derived under specific operating conditions. Actual results may vary.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Statements regarding IBM’s future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

All IBM prices shown are IBM’s suggested retail prices, are current and are subject to change without notice. Dealer prices may vary.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to actual people or business enterprises is entirely coincidental.

COPYRIGHT LICENSE:

This information contains sample application programs in source language, which illustrate programming techniques on various operating platforms. You may copy, modify, and distribute these sample programs in any form without payment to IBM, for the purposes of developing, using, marketing or distributing application programs conforming to the application programming interface for the operating platform for which the sample programs are written. These examples have not been thoroughly tested under all conditions. IBM, therefore, cannot guarantee or
imply reliability, serviceability, or function of these programs. The sample programs are provided "AS IS", without warranty of any kind. IBM shall not be liable for any damages arising out of your use of the sample programs.

**Trademarks**

IBM, the IBM logo, and ibm.com are trademarks or registered trademarks of International Business Machines Corp., registered in many jurisdictions worldwide. Other product and service names might be trademarks of IBM or other companies. A current list of IBM trademarks is available on the web at "Copyright and trademark information" at [www.ibm.com/legal/copytrade.shtml](http://www.ibm.com/legal/copytrade.shtml).

Adobe is either a registered trademark or a trademark of Adobe Systems Incorporated in the United States, and/or other countries.

Intel, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.

Linux is a trademark of Linus Torvalds in the United States, other countries, or both.

Microsoft and Windows are trademarks of Microsoft Corporation in the United States, other countries, or both.

Java and all Java-based trademarks and logos are trademarks or registered trademarks of Oracle and/or its affiliates.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Other product and service names might be trademarks of IBM or other companies.

**Terms and conditions for product documentation**

Permissions for the use of these publications are granted subject to the following terms and conditions.

**Applicability**

These terms and conditions are in addition to any terms of use for the IBM website.

**Personal use**

You may reproduce these publications for your personal, noncommercial use provided that all proprietary notices are preserved. You may not distribute, display or make derivative work of these publications, or any portion thereof, without the express consent of IBM.
Commercial use

You may reproduce, distribute and display these publications solely within your enterprise provided that all proprietary notices are preserved. You may not make derivative works of these publications, or reproduce, distribute or display these publications or any portion thereof outside your enterprise, without the express consent of IBM.

Rights

Except as expressly granted in this permission, no other permissions, licenses or rights are granted, either express or implied, to the publications or any information, data, software or other intellectual property contained therein.

IBM reserves the right to withdraw the permissions granted herein whenever, in its discretion, the use of the publications is detrimental to its interest or, as determined by IBM, the above instructions are not being properly followed.

You may not download, export or re-export this information except in full compliance with all applicable laws and regulations, including all United States export laws and regulations.

Bibliography

You can order many IBM publications such as product manuals or IBM Redbooks online at the [IBM Publications Center](http://publications.ibm.com) website.

You can also order by telephone by calling one of the following numbers:

- In the United States: 800-879-2755
- In Canada: 800-426-4968

In other countries, contact your software account representative to order Tivoli publications.

**IBM Tivoli OMEGAMON XE for DB2 Performance Expert publications**

The product library covers the following information units:

- **OMEGAMON XE for DB2 PE and OMEGAMON XE for DB2 PM**
  - Configuration and Customization [GH12-7072]
  - Parameter Reference [SH12-7073]
  - Monitoring Performance from the OMEGAMON Classic Interface [SH12-7068]
  - Monitoring Performance from the IBM Tivoli OMEGAMON Enhanced 3270 User Interface [SH12-7074]
  - Monitoring Performance from Performance Expert Client [SH12-7069]
  - Monitoring Performance from ISPF [SH12-7070]
  - Report Command Reference [SH12-7066]
  - Report Reference [SH12-7065]
  - Reporting User’s Guide [SH12-7071]
  - Messages [GH12-7067]
  - Buffer Pool Analyzer Configuration Guide [SH12-7076]
  - Buffer Pool Analyzer User’s Guide [SH12-7075]
  - Program Directory for Performance Monitor [GI19-5019]
  - Program Directory for Performance Expert [GI19-5020]
  - Quick Start Guide for the SQL Dashboard and the end-to-end SQL monitoring functions [GH12-7064]

**Information on InfoSphere® Optim™ Performance Manager for Linux, UNIX, and Windows**

- [IBM InfoSphere Optim Performance Manager in the Knowledge Center](http://publib.boulder.ibm.com/infocenter/omgpm/v1r0/topic/com.ibm.omegamon.xe.db2.pm.doc/gh12-7000.html)

The documentation is provided in PDF and htm format in the:

- [Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS in the IBM Knowledge Center](http://publib.boulder.ibm.com/infocenter/omgpm/v1r0/topic/com.ibm.omegamon.xe.db2.pm.doc/gh12-7000.html)
- [Tivoli OMEGAMON XE for DB2 Performance Monitor on z/OS in the IBM Knowledge Center](http://publib.boulder.ibm.com/infocenter/omgpm/v1r0/topic/com.ibm.omegamon.xe.db2.pm.doc/gh12-7000.html)

**IBM Tivoli Monitoring information**

For the most current information, see [Tivoli Monitoring in the IBM Knowledge Center](http://publib.boulder.ibm.com/infocenter/tiviki/v1r0/topic/tivoli journalists/tivoli monitoring.html).
IBM z/OS information

For the most current information, see the IBM Knowledge Center.

IBM DB2 information

For the most current information, see:

- IBM DB2 Tools Product Documentation
- IBM DB2 for z/OS in the IBM Knowledge Center

Other IBM information

For IBM publications that are not directly related to OMEGAMON XE for DB2 PE and PM, see IBM Publications Center or IBM Knowledge Center.

IBM Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS
Buffer Pool Analyzer for z/OS Configuration Guide
Version 5.4.0

Publication No. SH12-7076-00

We appreciate your comments about this publication. Please comment on specific errors or omissions, accuracy, organization, subject matter, or completeness of this book. The comments you send should pertain to only the information in this manual or product and the way in which the information is presented.

For technical questions and information about products and prices, please contact your IBM branch office, your IBM business partner, or your authorized remarketer.

When you send comments to IBM, you grant IBM a nonexclusive right to use or distribute your comments in any way it believes appropriate without incurring any obligation to you. IBM or any other organizations will only use the personal information that you supply to contact you about the issues that you state on this form.

Comments:

Thank you for your support.
Send your comments to the address on the reverse side of this form.
